Directions
1. Draw 3-5 ml of peripheral blood in lavender top EDTA tube
2. Label tube with patient first/last name, DOB, and collection date/time
3. Place tube in a biohazard bag and form into document sleeve of the biohazard bag ensuring no patient information is visible
4. Ship specimen overnight in appropriate packaging at room temperature or with cold pack (Monday-Thursday only)

REASON FOR TESTING (Required-failure to include diagnosis may delay testing)

Diagnosis:

ICD10 Code(s):

TESTING REQUESTED: Testing is performed by exome capture next generation sequencing of the coding regions of relevant genes, which detects small sequence variants. Starred tests (*) include additional testing by an alternate methodology when sequencing does not identify genetic alterations consistent with a molecular diagnosis. Core gene panels are comprised of genes established as causal for the relevant clinical condition. Expanded gene panels include analysis of all genes found in the core panel plus additional genes of uncertain significance that are implicated in the condition or indication. Please visit pathologyservices.wustl.edu for full details on ordering of core versus expanded cardiac panels.

Please see website (pathologyservices.wustl.edu) for gene lists and details on the ordering of core versus expanded gene panels.

☐ ***Cardiac Disease gene panel with interpretation** ☐ Core 82 genes, ☐ Expanded genes 150
☐ ***Arrhythmia panel with interpretation** ☐ Core 13 genes, ☐ Expanded 35 genes
☐ **Brugada Syndrome with interpretation** ☐ Core 1 gene, ☐ Expanded 17 genes
☐ ***Catecholaminergic Polymorphic Ventricular Tachycardia panel with interpretation** ☐ Core 7 genes
☐ ***Long QT Syndromes panel with interpretation** ☐ Core 10 genes, ☐ Expanded 16 genes
☐ ***Cardiomyopathy panel with interpretation** ☐ Core 52 genes, ☐ Expanded 96 genes
☐ ***Arrhythmogenic Right Ventricular Cardiomyopathy panel with interpretation** ☐ Core 11 genes, ☐ Expanded 17 genes
☐ ***Dilated Cardiomyopathy panel with interpretation** ☐ Core 33 genes, ☐ Expanded 68 genes
☐ **Hypertrophic Cardiomyopathy panel with interpretation** ☐ Core 28 genes, ☐ Expanded 42 genes
☐ ***Familial Thoracic Aortic Aneurysm and Dissection panel with interpretation** ☐ Core 18 genes, ☐ Expanded 25 genes

ADDITIONAL NOTES:

Healthcare Professional Signature to Authorize Testing, Statement of Medical Necessity and Transmission of Results Verification
I certify that the patient specified above and/or their legal guardian has been informed of the benefits, risks, and limitations of the laboratory test(s) requested and Informed Consent has been obtained, as well as any other consent from the patient required by my state in order to perform a genetic test on a specimen has been obtained. I further certify that the test(s) requested is/are medically necessary and the results of this test will be used in the medical management of the patient.

The undersigned Client authorizes the Washington University School of Medicine to send Protected Healthcare Information (PHI) as identified in the Health Insurance Portability and Accountability Act (HIPAA) to the facsimile phone number above. Client acknowledges they are solely responsible for adopting and implementing appropriate policies and procedures, including physical safeguards, so that the location and use of the facsimile machine complies with all applicable HIPAA regulations.
